Professional Summary

2026 B.Tech Mechanical Engineering graduate seeking an entry-level Data Analyst role. Hands-on project experience in SQL, Excel, Power BI and Tableau, covering data cleaning, exploratory analysis, KPI reporting and interactive dashboards. Applied these skills to insurance, restaurant, retail, sports and healthcare datasets to summarize trends and present clear findings.

Project Experience

Insurance Policy Data Analysis

Analyzed 5,000 customers and 5,000 policies across customer information, policy details, payments, claims and renewal datasets. Built dashboards to explore policy status, age and gender distribution, premiums, coverage and claim amounts. Used SQL aggregations, CASE expressions, CTEs and LAG window functions to calculate KPIs and compare yearly premium trends. Added filters and visual summaries for exploring policy and payment patterns.

Technologies used: SQL (MySQL), Microsoft Excel, Power BI, Tableau

Zomato Restaurant Analysis

Analyzed 9,551 restaurants across 15 countries and 141 cities to understand restaurant distribution, cuisines, ratings and pricing. Joined restaurant and country data, created price buckets and date groupings, and compared online delivery and table-booking availability. Developed Excel PivotTable reports, Tableau calculations and a two-page Power BI report presenting geographic and restaurant-service patterns.

Technologies used: SQL (MySQL), Microsoft Excel, Power BI, Tableau

IPL Performance Analysis

Explored match outcomes, toss decisions, batting performance, wickets and venues using SQL joins and grouped queries. Created a season-filtered Power BI dashboard displaying team standings, winners, runners-up and Orange Cap and Purple Cap statistics to compare team and player performance.

Technologies used: SQL (MySQL), Power BI

Hospital Emergency Department Dashboard

Built four Power BI report pages for monthly trends, consolidated performance, patient details and key takeaways. Visualized patient volumes, waiting times, satisfaction scores, admissions, age groups and department referrals using KPI cards, charts and slicers.

Technologies used: Power BI

Blinkit Retail Analysis

Prepared SQL queries to check missing values and standardize product-category labels. Compared sales by item type, price band, outlet size, location tier and outlet type using CASE expressions and grouped summaries to explore retail sales patterns.

Technologies used: SQL (MySQL)

Swiggy Restaurant Analysis

Cleaned restaurant data through trimming, string replacement, type conversion and missing-value checks. Compared city-wise restaurant counts, cuisines, branch presence, ratings and costs using aggregations and HAVING filters.

Technologies used: SQL (MySQL)

Education

PVKK Institute of Technology, Anantapur CGPA: 7.8

B.Tech in Mechanical Engineering | Completed 2026

Government Polytechnic College, Sathyavedu CGPA: 6.5

Diploma | Completed 2022

Priyadarsini Vidyamandir High School CGPA: 8.5

Secondary School Certificate (SSC) | Completed 2019

Technical Skills

SQL: MySQL, joins, aggregations, CTEs, window functions, CASE expressions
Excel: PivotTables, PivotCharts, slicers, formulas, data cleaning
Business intelligence: Power BI, Tableau, calculated fields, KPI dashboards
Analysis: Exploratory data analysis, validation, segmentation, trend analysis
Programming: Python, R
AI tools: Working knowledge of ChatGPT and AI-assisted tools.

Certification

NASSCOM Certification for Data Analytics | October 2026
